R. No. 5913 9-Hyg-45-1 dated 23rd January 1946.

Sir,

Sub:- Licence - Mangalore - South Kanara Dt. Mill of Mr. Haji Abdul Kadir Bava - Objection.

....

I forward herewith the petition dated 13-11-45 (submitted by Mr.V. Husain Kunhi) together with its enclosures in original for the reference of Government and retransmission.

2. It is clear from the proceedings of the Collector that the action of the Council in having granted licence to the Eleectric Motors on the original site is not in order. The resolution of the Council in this behalf may be rescinded. The grant of the licence for one of the electric motors on the new site recommended by the Collector may however be allowed and the shifting of the other insisted on.

for Director of Public Health, Madr

BV/24-1.

TO

THE DIRECTOR OF PUBLIC HEALTH,
M A D R A S

Petition submitted by V. Husain Kunhi,
Merchant,
Bunder, Mangalore, South Kanara.

Sir,

I beg to bring the following facts for your kind consideration and necessary action.

My residential house in Nireshwallya, Mangalore Town adjoins the warehouse of Mr. Haji Abdul Khadir Bava, Coffee and Manure Merchant. It was formerly the residential house of Mr. Bava, but a few years ago it was converted into a warehouse.

Some years ago Mr. Bava installed an electric motor for polishing coffee at the far end of the premises. But later on he constructed an extension building close to my residential house and installed two electric motors of 10 H.P. each for crushing tapioca, bones, groundnuts, cake, etc. The nuisance caused by the tapioca and groundnut powder flying about the premises was such that it was impossible to live in the neighbourhood. As the motors were installed within a distance of a foot from my building the vibration caused by the working of the motors shakes the very foundation of my building and other buildings in the neighbourhood. The noise was such that it was impossible to have quiet peace or rest either during the day or night because the motors are being worked day and night. The locality is a residential

locality and there are a number of houses in the neighbourhood. There does not seem to be satisfactory record of a proper licence having been granted for the installation of the two electric motors in the Municipality at the beginning, the place where these motors are worked is only about two furlongs distant from the present Health Office.

I began objecting to the working of the electric motors from the very beginning with the Health Officer and the Municipality. Sometimes crushing tapioca and bones was prohibited by the Health Officer and Mr.Bava even defied the said order by working the motors and he was even prosecuted twice or thrice. On one occasion he compounded the offence. Later on the Health Officer prohibited the working of the motors and Mr. Bava appealed to the Municipal Council who licensed one of the motors in the very place by imposing certain conditions.

But Mr. Bava who is a rich and influential person defied all restrictions and began plying the motors day and night. I approached the Sub-Divisional I Class Magistrate, Mangalore, under Sec.133 Criminal Procedure Code for abatement of nuisance. The Sub-Divisional Magistrate by an enquiry through the Inspector of Police, Mangalore, prohibited the working of both the electric motors. A copy of the Inspector's report is produced herewith for perusal. But after sometime the Sub-Divisional Magistrate permitted the working of one of the electric motors which gave Mr. Bava ample scope to work both the motors as it is impossible to supervise and to keep a watch over the premises by anybody. More-

over the motors are worked within closed doors by one electric ~~swkx~~ switch. Even the Inspector of Police was not shown the other motor when he inspected, which can be seen from his report. The nuisance caused by the working of the motors was so great and injurious to the health of the members of my family that most of us got sick and we were obliged to quit the house temporarily.

In my helplessness, I approached the District Collector under the District Municipalities' Act for quashing of the Municipal Resolution granting a licence. The Collector held a thorough enquiry by personally inspecting both the premises and the working of the electric motors and passed orders, copy of which is enclosed.

According to the above order of the Collector Mr. Bava is prohibited from working even one electric motor as at present installed. The Collector pointed out a vacant space a little farther away where the motors could be shifted where one motor could be worked and the parties agreed to this and the Collector's order is ~~xx~~ based on this compromise.

But the motors were not shifted from the original place for a long time and they were not worked for several months since Collector's order. He has recently shifted to the new place only one of the motors, keeping the other in the original place. It is very astonishing that since about 10 days he has begun working both the electric motors day and night, ignoring the past litigation and also the compromise and the Collector's order and what is more without a licence

from the Health Officer and ignoring the existence of the Health Office which is only 2 furlongs from the place. Both the motors are manipulated by one switch and both are worked simultaneously. One motor in the original place cannot be worked even singly according to the view of the Collector. But he is out to challenge all. The nuisance is again there in such a virulent form as before. He openly says that he will face the petty prosecutions and objection petitions and gain time by months by which time he can manufacture and thousands of tons of manure.

I also beg to bring to your kind notice that the new Health Officer of the Municipality who is new to the past history of this matter is considering the possibility of licensing both the motors. He inspected the premises. I was sent for by the Health Officer who put forth several arguments in favour of working both the motors. It is very strange that he should give room for re-opening of the controversy. I have since acquainted him with full details of the previous history of the case and the final compromise and Collector's order.

I am approaching the Collector for redress in the matter of the other party violating the conditions of compromise and collector's order. I am maintaining a diary of dates and hours when Mr. Bava is working the electric motors clandestinely without a licence and I shall seek redress at the hands of the Health Officer in the first instance. My object in approaching your honour is this. Having regard to the previous history of the case, it is obvious that the working of the motors either one or both is a positive nuisance and danger. My building which is worth more

than fifty thousand rupees is in immediate danger of collapsing. The place is a residential locality. I agreed for the installation and working of one electric motor at the new place with a view to avoid further controversy and to avoid the greater danger to my building. But certainly it is not a place where such an industry could be permitted by the Health Department. A local inspection will amply testify to this. The said Mr. Bava has got ample space for installation of the motors on the opposite side of the road at the same locality which is an industrial area. There are no dwelling houses or buildings closeby. He has got a warehouse with ample space behind where he could without detriment to the safety and health of the public could instal and work. He is very rich and could easily afford this shifting. He is persisting the present place out of malice.

Moreover, if he is ~~even~~ permitted to work one motor in the present premises he will work both. It is humanly not possible to keep vigilance over the working to see whether one is worked or both are worked for any authority. The motors are worked within closed doors and by one switch. It is therefore essential that he should be prohibited from installing and working in the present premises.

As he is a persistent defaulter and bent upon working the motors in defiance of the authorities, the nuisance cannot be effectively abated unless he is prohibited from working the motors not only in the original place, but any other place in the same premises. Even if one motor is allowed he will work both.

I therefore beg to approach you, the highest authority as a last resort for redress. A personal inspection by you will be very useful. I therefore request that after a enquiry, you may be pleased to direct the local authority to refuse to grant a licence for the working of the motors, of even one electric motor in the present premises as it is in the opinion of several predecessors of the present Health Officer and the Collector of the District as not only injurious to the health of the public, but a positive danger to the adjoining buildings and their occupants.

Mangalore,
13th November '45.

Your most obedient servant,

V Dis No 54139-Hyg-45 dated 20.11.45

Forwarded for resubmission with a detailed report

19-11-45

for Director of Public Health
Madras

17/11/45 AS 17/11

To The Municipal Health Officer,
Mangalore

This case No. 20/1943.
Resubmitted

This day I inspected the premises of Mr. Haji Abdul Khadir Sava where an electic motor is worked and ground nut oil cake is powdered. Tapioca also had been pwdered but now due to want of the raw material it is not done. The building in which the motor is fixed is right in the centre of human dwellings. The particular room in which it is run is not properly guarded to prevent the powder escaping from the grinding machine and defiling the atmosphere. Still further through a funnel fitted to the machine the oil cake powder is regularly escaping into the air just like smoke and pervades the whole surroundings. The houses in the surroundings are all covered by Tapioca and grbund nut cake powder and inhaling the same causes one to sneeze and put to uncomfortableness as I myself experienced. It must be unhealthy and injurious to human system from a hygenic point of view. The petitioner's house is close adjoining the building in which the powdering goes on and every crevice in the house one can gather the powder and as personally seen one cannot comfortably live in the same without inhaling the injurious powder and also taking it in, in food and drink. The fourdation of the motor not being strong and there having no stock absorber when it is worked there is a regular vibration to the buildings around there also the petitioner's house having the worst share of it and this may prove dangerous to the same. Thus on the whole the location of the motor so close to human dwellings without proper arrangements for the safety and health of the neighbours is a danger and nuisance to the public and as such action under sec. 133 cr.P.C may be taken.

Proceedings of the Collector of South Kanara dated 12th December 1944.

Rao Saheb Sri P. Ramadoss, B.A.

TRADE - offensive and Dangerous - Mangalore Municipality - Nuisance - Cancellation of licence - Granted to Hajee A.K. Sava & Sons - Petition - Orders passed.

Ref: (1) Petition dated 22-11-1944 from Janab V. Hussain Kunhi, merchant, Bunder, Mangalore.

(2) Report dated 23-11-1944 from the Commissioner, Mangalore Municipality.

(3) Connected papers.

O r d e r.

This is a petition by Janab V. Hussain Kunhi, Merchant, Bunder, under section 36 of the Dt. Municipalities Act for suspending or cancelling Resolution No.20 dated 6-11-1944 of the Municipal Council, Mangalore, in which the counter-petitioner Janab Abdul Khader Haji Sava was granted a licence for working the electric motors located in T.S.No.125-1 of the 22nd Ward of Mangalore Town.

2. The dwelling house of the petitioner adjoins the premises in which the electric motors are installed. The petitioner's complaint is that the vibrations of the electric motors are so intense that dwelling in the adjacent house is impossible, that the working of the motors is injurious to the building and the health and safety of the residents and that the crushing of tapioca and stocking of bones in the premises by the counter-petitioner will be injurious to the health of the residents in his house. I inspected the petitioner's house as well as the premises in which the two electric motors are located and also observed the extent and intensity of the vibrations caused by the working of the motors, ~~xxxxxxxxxx~~ singly and doubly. The working of both the electric motors at the same time causes such an intensity of vibration that I found the whole building of the petitioner vibrating in every nook and corner and the window panes and other zinc sheets eaves of the house all shaking and rattling. I should consider that residence in the petitioner's dwelling should be extremely difficult and inconvenient when both the motors work. It must be regarded as dangerous to the building and to the health and safety of the people living therein. Therefore working of both the motors at a time should certainly be prohibited. But the licence is for working only one of the motors at a time. Even if one of them is worked, still the vibrations are felt in the petitioners building, no doubt with loss intensity but certainly appreciably so as to cause material inconvenience and injury to the health and safety of the people. Therefore it would appear necessary to prevent the working of the motors even singly as installed at present. There is a vacant space a little farther away to which place the motors could be shifted. The counter-petitioner agrees to do so and the petitioner agrees to allow one engine at a time to work in the said place. They have entered into a sort of compromise in the matter and filed petitions of agreement. As the matter is likely to be amicably settled, and as the licence of the Municipal Council is for working only one of the two motors at a time and as the licence does not permit the crushing of bones, I do not consider that just at present there is sufficient justification to interfere by suspension of the licence. I consider that the stocking of bones and crushing of tapioca except in conformity with conditions imposed by the Municipal Health Officer are highly objectionable in this locality and the Municipal Council should reconsider their decision. The petitioner may move again in case the conditions of compromise are not fulfilled or if either the crushing of tapioca contrary to the Municipal Health Officer's conditions or the stocking of bones in the locality actually commences.

ENCLOSURE. 19

Copy of the report of the Municipal Health Officer, Mangalore, Roc No. 554/46, dated the 22nd February 1946 to the Commissioner, Mangalore Municipality, Mangalore.

Subject: LICENCE -- Mangalore Municipality -- Janab Haji Abdulkhader Bava..

Ref:- Your letter C2/2048-46, dated the 20th Feb. 1946.

- - - - - - -

At the time when the proceedings D.Dis. 13494-44, dated the 12th December 1944 of the Collector of South Kanra was received, Janab Haji K. Abdulkhader Bava was having temporrary licence for three months from 10th November 1944 to 10th February 1945 granted in accordance with council resolution No.20, dated the 6th November 1944 for storing bones, (steamed and powdered) for powdering ground nut cakes and preparing tapioca and for working two 10 H.P. Electric motors one at a time.

The Collector's proceedings was placed before the council and council in Resolution No.1, dated the 5th February 1945, passed the following resolution.

"Read proceedings D. Dis. No.13494/44, dated the 12th December 1944 of the Collector of South Kanara, Mangalore, issuing orders on the petition from Janab V. Hussein Kunhi regarding the issue of licence granted to Hajee K.Abdulkhader Bava and directing the council to reconsider its decision and the file of connected papers.

"Resolved to grant licence in the new site".

After the suggestions of the Collector of South Kanara Janab Hajee K. Abdulkhader Bava applied to the council for permission to instal one 10 H. P. Electric motor in the new site. Council granted permission for this installation in its resolution No.11, dated the 26th March 1945. Licence for working of this electric motor under section 249 of the Madras District Municipalities Act was granted by the Municipal Health Officer on 24th May 1945 for the year 1945-1946.

Janab Hajee K.Abdulkhader Bava is ~~nothing~~ neither storing bones nor powdering tapioca now in the old premises. This is in conformity with the suggestions of the Collector of South Kanara.

On 26th October 1945 Janab Hajee K. Abdulkhader Bava applied for a licence under Section 249 of the Madras District Municipalities Act to to grant him a licence to work 10 H.P. Electric motor for powdering ground nut cake in the old premises.

A licence for working ~~for~~ of this electric motor for powdering ground-nut cakes only was granted on 31st December 1945 till 31st March 1946 on the following conditions:-

"1) The horse power should not be increased without the notice of this office.
2) The motor should be fixed properly.
3) Proper precautions should be taken to prevent shake.
4) The motor should be used only to convert ground-nut oil-cakes into powder.
5) Tapioca and other fine powders should not be grinded.
6) All effective precautions should be taken to prevent nuisance from dust.
7) The place where the flour will be collected should be air-tight.
8) The opening of the grinder also should be closed air-tight.

new site did not cancel the permission for the electric motor which Janab Haji K.Abdulkhader Bava held for the old site.

Sanitary Inspector reports that Janab Haji K.Abdulkhader Bava is not working the electric motor of 10 H.P. in the old site as he is causing improvements to satisfy the licence conditions imposed by me. I have also inspected the site. The electric motor is not working now.

Janab Haji K. Abdulkhader Bava has applied for licence to work both the electric motors of 10 H.P. each, I one motor in the site selected by the Collector, II Another motor in the old site, during the year 1946-1947. As orders on this application have to be passed within 30 days of the receipt of the application and as the council has not cancelled the permission which Janab Haji K. Abdulkhader Bava holds for installation of the 10 H.P. Electric Motor in the old site, I have placed the subject before the council for its decision. This will come up before the council on 25th February 1946. If they decide to cancel the permission for the electric motor in the old site, then the suggestions of the Collector can be said to have been fully carried out.
